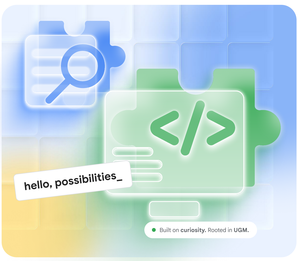
GDGOC UGM • 2026/2027

Big ideas. Built together.

A place for curious minds at **Universitas Gadjah Mada** to learn, connect, and build technology that matters.

Find your learning track → | Get to know us →

Different backgrounds. A shared curiosity.



- Learn by doing
- Connect across disciplines
- Build with purpose

A CAMPUS. A COMMUNITY.

Not just learning tech. Finding your people.

More about GDGoC UGM →

Google Developer Groups on Campus, Universitas Gadjah Mada brings students together around one simple idea: we can go **further** when we **learn** with each other.

From your first line of code to your next product idea, there's room to ask questions, share what you know, and try something new.

Student-led · Peer-powered · Curiosity-first

FIND YOUR STARTING POINT

Many interests. One shared journey.

Follow what excites you. Explore a track, then connect the dots with others.

See the overview →

EXPLORE THE WHY

Research & discovery

Ask better questions, understand people, and turn insight into a clear problem worth solving.

Problem framing · User research · Product thinking

Explore this track →

MAKE IT MEANINGFUL

Design & creativity

Translate ideas into thoughtful experiences, from a first sketch to a prototype people can use.

UI/UX · Visual storytelling · Prototyping

Explore this track →

BRING IDEAS TO LIFE

Development

Learn the tools, write the code, and build useful things with people who enjoy figuring it out.

Web & mobile · Cloud · AI foundations

Explore this track →

MORE THAN A CLASSROOM

Less watching. More making.

Learn in a way that turns a new concept into something you can actually use.

Study together

Work through foundations in peer learning sessions. Bring your questions; leave with a next step.

Study groups & guided practice

Try it hands-on

Explore a tool or technique in a workshop, then put it to work in a small experiment.

Workshops & technical sessions

Share the process

Exchange feedback, explain your decisions, and learn from different ways of thinking.

Project circles & sharing sessions

IDEA → PROTOTYPE

A little less friction. A better campus day.

Discover | Connect | Share

Start with a student need. Build a small, useful solution.

EXAMPLE PROJECT BRIEF • NOT A LAUNCHED PRODUCT

BUILD SOMETHING THAT MATTERS

Your next project could start on campus.

What if finding a study partner, sharing resources, or navigating campus felt easier? Small, familiar problems can be the beginning of meaningful work.

Bring research, design, and development together. Try an idea, get feedback, and make the next version better.

Explore project-based learning →

MAKE YOUR FIRST MOVE

You don't need to have it all figured out.

01

Follow your curiosity

Explore the tracks and find a topic you want to understand better.

02

Learn alongside others

Join a learning opportunity, ask a question, and share your perspective.

03

Turn learning into action

Practice through a project, exchange feedback, and pass something on.

Different majors. Different starting points. A place for all of them.

You don't have to be the most experienced person in the room. Curiosity, kindness, and a willingness to learn are a good place to start.

A FEW GOOD QUESTIONS

Wondering where to begin?

Ask us a question →

Do I need to know how to code?

No. Start with an interest in technology and a willingness to learn. Research and design are part of the journey, too.

Is this only for computer science students?

Different disciplines bring different perspectives. Explore the overview to find a starting point that fits your interests.

How can I find learning opportunities?

Keep an eye on @gdgoc.ugm for community updates. You can also use the contact page to ask about getting involved.

YOUR NEXT CHAPTER

Bring your curiosity. We'll build from there.

Find a learning track, meet a collaborator, or start a conversation.

Explore the overview →

Talk to the community →

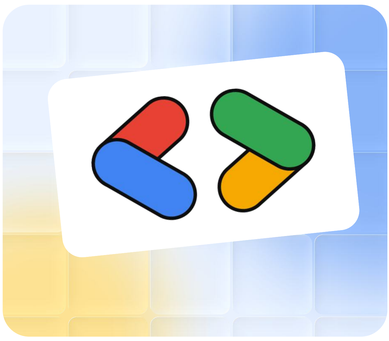
Made for the campus. Open to possibilities.

ABOUT GDGOC UGM

Built by students. For what's next.

We're a community of learners and makers at Universitas Gadjah Mada, connected by curiosity and the belief that technology can do good.

UNIVERSITAS GADJAH MADA • 2026/2027



WHY WE COME TOGETHER

A bridge from "I wonder" to "I made this."

Learning feels different when there's someone to exchange ideas with, a problem you care about, and the space to give it a try.

That's the spirit of Google Developer Groups on Campus at UGM. We create room for students to explore technology, develop practical skills, and learn from one another.

Our campus is the starting point. The questions we ask and the things we build can reach beyond it.

WHAT GUIDES US

Good technology starts with good company.

Stay curious

Ask the extra question. Be willing to learn something outside your comfort zone.

Make room

Welcome different perspectives, respect each other, and help people find their voice.

Learn by building

Try a small experiment. Share the rough version. Let feedback guide what comes next.

Give something back

Share a resource, explain what clicked, or help someone take their next step.

PEOPLE, NOT LABELS

There's more than one way to contribute.

You can be learning one day and helping someone else the next. A community grows through both.

Come as a learner

Explore a topic, join a discussion, and ask the question that's been on your mind.

Grow as a collaborator

Work with people whose skills complement yours. Discover what you can build together.

Give back as a contributor

Share knowledge, support a learning session, or bring an idea for the community.

Let's talk about getting involved →

A space to learn. A responsibility to care.

We want every conversation and learning experience to be respectful, inclusive, and constructive. Be kind, give credit, and make room for people who are just getting started.

YOUR NEXT CHAPTER

Bring your curiosity. We'll build from there.

Find a learning track, meet a collaborator, or start a conversation.

OVERVIEW • PROGRAMS & LEARNING TRACKS

Find your spark.
Build your own path.

Explore how research, creativity, and development connect. Start with one interest. Grow through practice and the people around you.

Learning tracks ↓ | Learning formats ↓ | Your learning journey ↓ | Find a starting point ↓

EXPLORE YOUR INTERESTS

Three ways in. Plenty of ways forward.

These pathways are starting points, not boxes. Follow one deeply or bring different skills together.

EXPLORE THE WHY

Research & discovery

Ask better questions, understand people, and turn insight into a clear problem worth solving.

Problem framing · User research · Product thinking

BRING IDEAS TO LIFE

Development

Learn the tools, write the code, and build useful things with people who enjoy figuring it out.

Web & mobile · Cloud · AI foundations

Explore this track →

From an interest to something you can show.

Pathway	What you can practice	A possible outcome
Research & discovery	Listening, problem framing, and testing assumptions	A research insight and a focused problem brief
Design & creativity	Ideation, user flows, and prototype feedback	An interactive prototype and a design story
Development	Coding, testing, and connecting tools	A working demo with a clear explanation

Illustrative learning outcomes. Topics and opportunities are shared through community updates.

WAYS TO LEARN

The format changes. The curiosity stays.

Explore the kinds of experiences that help you move from understanding to doing.

Study groups

Build foundations with peers. Work through a topic, compare approaches, and make space for questions.

Best for • Learning the fundamentals

Hands-on workshops

Get introduced to a tool or method, follow a practical exercise, and take away something to keep exploring.

Best for • Trying something new

Project circles

Connect research, design, and development around a shared problem. Learn through making and feedback.

Best for • Putting skills into practice

Knowledge sharing

Walk through an idea, share a lesson from your process, and discover how other students approach their work.

Best for • Exchanging perspectives

PROGRESS, NOT PERFECTION

A journey you can keep building on.

01

Discover

Explore a topic and find the questions you want to answer.

02

Practice

Try an exercise, work through a challenge, and ask for help.

03

Build

Apply your learning to a small idea with a clear purpose.

04

Share

Show your process, gather feedback, and help someone else.

START WHERE YOU ARE

New to tech? That’s a starting point, too.

You don’t need a finished portfolio or the perfect track choice. Pick a topic you’re curious about. If you’re unsure, tell us what interests you and we can start a conversation.

Ask about getting started →

YOUR NEXT CHAPTER

Bring your curiosity. We’ll build from there.

Find a learning track, meet a collaborator, or start a conversation.
